

# EIK Engineering

Your Trusted Equipment & Attachments Specialist

Newsletter, October 2014

We build with Pride, You use with Trust.

Designed for Functionality, Engineered for Reliability.

Robotic Welding Machine

Compromising in quality is not an option

Year 2013 & 2014 have been extremely exciting both EIK and our customers. Our facilities have expanded and undergoing a series of equipment upgrading programs.

The latest upgrading is the state-of-the-art robotic welding machines. We have invested 2 additional robots, one for the long reach boom and the other for the bucket products. The robots are leader in their respective field with proven German technologies and engineering.

With our commitment in ongoing quality improvement and the philosophy in constantly upgrading of equipment, we believe this is the best reward in appreciating our valued customers for their support.

We want customers to be assured of the values and ROI for investing in EIK products.

The EIK team would like to thank our customer whole heartedly for the appreciation and recognition for the successful partnership.

Customer Appreciation Award

Recognition is our motivation

The award serve as a tremendous source of motivation that shall spur our team to achieve greater challenges ahead. Our goal has always been to deliver a win-win proposition for any partnership that can stand for the test of time.

The much anticipated new facility in Kuala Lumpur (KL) is finally up and running. Our business in Peninsular Malaysia has grown tremendously, as a result, the previous branch office in KL was overwhelmed and needed an expansion.

This new and bigger facility house both the sales office and regional support center in a single building. Our expanded team can now foster greater intimacy with customers in the surrounding regions.

New Branch office in Kuala Lumpur

Sales and service support all in one

We thank you for your active participation in the Aug/Sept Guess & Win game. We do have winners and they all have been informed by now. Some customers who wrote to us commented that it was such a refreshing idea and they have enjoyed it, however, the hint could be more obvious.

Thank you for your feedback, we heard you loud and clear 😊.

**Like, Guess & Win**  
With **EIK**
